                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      RESULT 39
PQ0656
outer capsid spike protein VP4 - human rotavirus (strain AU387) (fragment)
NyAlternate names: VP8* protein
NyAlternate names: VP8* protein
C;Species: human rotavirus
C;Species: human rotavirus
C;Species: human rotavirus
C;Bote: 14-Jul-1994 #sequence_revision 14-Jul-1994 #text_change 20-Jun-2000
C;Accession: PQ0656
R;Makagomi, O.; Isegawa, Y.; Ueda, S.; Gerna, G.; Sarasini, A.; Kaga, E.; Nakagomi, T.;
J. Gen. Virol. 74, 1709-1713, 1993
A;Reference number: PQ0651; MUID:93346985; PMID:833919
A;Recession: PQ0656
A;Molecule type: mRNA
A;Residues: 1-247 cNRNA
A;Comment: This protein plays a role in viral neutralization, viral virulence and haemag
                                                                                                                   Outer capsid spike protein VP4 - human rotavirus (strain AU115) (fragment)
Nyternate names: VP8* protein
Nyternate names: VP8* protein

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     RESULT 48

5374373
heat shock protein grpE - Synechocystis sp. (strain PCC 6803)
N/Alternate names: hypothetical protein sll0057
C;Species: Synechocystis sp.
G;Avariety: PCC 6803
C;Accession: S74373
Rsquence_revision 25-Apr-1997 #text_change 09-Jul-2004
C;Accession: S74373

Histidine-binding periplasmic protein NMA1811 [imported] - Neisseria meningitidis (strair c) Species: Neisseria meningitidis
C;Species: Neisseria meningitidis
C;Accession: H81806
R;Parkhill, J.; Achtman, M.; James, K.D.; Bentley, S.D.; Churcher, C.; Klee, S.R.; Morell)
HAITOYA, S.; Jagels, K.; Leather, S.; Moule, S.; Mungall, K.; Quail, M.A.; Rajandream,
Nature 404, 502-506, 2000
A;Attle: Complete DNA sequence of a serogroup A strain of Neisseria menigitidis Z2491.
A;Reference number: A81775; MUD:20222556; PMID:10761919
A;Accession: H81806
A;Status: preliminary
A;Molecule type: DNA
A;Residues: 1-268 < PAR>
A;Cross-references: UNIPROT:Q9JTE4; GB:AL162757; GB:AL157959; NID:g7380371; PIDN:CAB850381

NiAlternate names: protein T31P16.220
Cispecies: Arabidopsis thaliana (mouse-ear cress)
Cibate: 02-Jun-2000 #sequence_revision 02-Jun-2000 #text_change 09-Jul-2004
CiAccession: T50027
RiBevan, M.; Zimmermann, W.; Grueneisen, A.; Wambutt, R.; Kalicki, J.; Wohldmann, P.; submitted to the Protein Sequence Database, May 2000

C18351
phosphorotein phosphatase (EC 3.1.3.16) 2A-beta 55K regulatory chain - rabbit (fragment phosphorotein phosphorotein domestic rabbit)
C;Species: Oryccolagus cuniculus (domestic rabbit)
C;Accession: C38351
R;Mayer, R.E.; Hendrix, P.; Cron, P.; Matthies, R.; Stone, S.R.; Goris, J.; Merlevede, M Biochemistry 30, 3589-3597, 1991
A;Title: Structure of the 55-kDa regulatory subunit of protein phosphatase 2A: evidence A;Secession: C38351
A;Accession: C38351
A;Status; preliminary

Electrophoresis 20:2181-2195(1999).
-!- SIMILARITY: Belongs to the GCRR family.
-!- SIMILARITY: Contains 1 SIS domain.
-!- CAUTION: Ref. 2 sequence differs from that shown due to a frameshift in position 87.
